ROCK SEA RESIDENCE

Petrothalassa

Ermioni

GREEN Properties expands its activity by designing beach houses for the first time, located in Ermioni Argolidas.

We have created ROCK SEA residence in a green area – a few steps away from Petrothalassa beach. This modern complex consists of six energy-efficient A+ properties, designed with minimal aesthetics, each featuring its own pool and garden.

The properties have large openings with unobstructed view towards both the sea and the greenery of the area. The natural light enters the property and at the same time the strategic positioning of the property protects the privacy. The view, combined with the shades of grey and white, composes an environment of relaxation and wellness.

By choosing your new home from GREEN Properties, you are

choosing the home of your dreams! You have the possibility to design the kitchen and bathrooms based on your personal taste, but also to choose the materials based on your needs and preferences, always with the constant support of our specially trained in-house team of decorators.

The green philosophy advocated by our company is applied to all our projects. We take advantage of the orientation of the buildings for natural light and install photovoltaics with a net metering system for the shared electricity. We also apply a thermal facade to the entire external surface of the building to minimize energy losses and use energy-efficient aluminum frames of high aesthetics. These practices not only save energy, but also reduce our environmental footprint.
